ASBESTOS AWARENESS

This ½ day Qualpass accredited course is aimed at raising awareness of the types of asbestos previously used in the UK, its past applications and likely locations/ uses in premises which may be worked in by a client's employees.

This course can be tailored to the Client's activities in relation to where asbestos or asbestos containing materials may be present or uncovered during building, renovation or demolition tasks. The Safe Systems of Work session can reference into the Client's own procedures, as can the written assessment, to ensure delegates are evaluated on their general asbestos knowledge together with specific procedures developed by their employer.

The course references the Control of Asbestos Regulations 2012 (which came into force on 6th April 2012), and the Health and Safety Executive's Asbestos Essentials guidance.

This course can also be tailored to cover the theory and safe working practices relating to the following notifiable non-licensed and non-licensed asbestos removal activities:

- Asbestos cement products
- Compressed asbestos gaskets
- Bitumen products mixed with asbestos
- Asbestos awareness for scaffolders

Clients should note this course does not qualify their employees to remove asbestos or asbestos containing materials which require a license to remove.

COURSE ASSESSMENT

Delegates complete a written assessment based on the asbestos awareness course they have attended.
